Job description

ZEAL Network SE is an international, listed group of companies that has been creating exciting and entertaining lottery experiences for over 20 years. In Germany, we are the largest provider of online lotteries through our brands, LOTTO24 and Tipp24. In Spain we work with the second largest national lottery, ONCE. Through ZEAL Ventures, we are involved in exciting e-commerce start-ups such as Omaze and DAYMADE. We have 270+ employees from various countries who act independently and think in a visionary way. Our corporate culture is characterized by team spirit, empowerment, and high ambition. Together we have a clear goal: to encourage people to dream.

Are you passionate about crafting immersive gaming experiences in the iGaming industry? Join us as a Game Developer (f/m/d), where you'll bring innovative online slots, instant win games, and scratchcards to life. If you thrive in a creative environment and excel at

Games-Career.com is a service provided by:

developing captivating games, this is your opportunity to shine.

Your tasks:

- Develop cutting-edge online games using our advanced frameworks built with TypeScript, PixiJS and Vite.
- Create new games for the German and international markets.
- Collaborate with a talented team to enhance and evolve our frontend framework, integrating new features and optimizing performance.
- Innovate and implement exciting new game mechanics.
- Work closely with the art department to deliver exceptional visual experiences that captivate players.

What you offer us:

- Strong experience with TypeScript and PixiJS.
- Proficiency in debugging and optimizing a PixiJS application, focusing on performance and scene graph management.
- Expertise in working with complex, custom asynchronous code.
- Passion for creating engaging animations and effects using PixiJS.
- Deep understanding of user interaction and interface design principles.
- A collaborative mindset with the ability to thrive in a team-oriented environment.
- Experience with creating scenario-generators for games would be a plus.
- Familiarity with Kotlin or Go (our back-end technologies) would be a plus.
- Experience with tools and frameworks like Three.js, TexturePacker, Spine, WebAudio, GLSL shaders, Photoshop, or other image processing software are a nice-to-have.
- 2+ years of game development experience, ideally in the iGaming industry and/or proven experience delivering games to the public.
